

Epi-Pen Policy

Pursuant to ensuring the health and safety of students, a school nurse or trained school employee may administer auto-injectable epinephrine, as defined in RS 17:436.1 subparagraph (J)(4)(a) to a student who the school nurse or trained school employee, in good faith, professionally believes is having an anaphylactic reaction, whether or not such student has a prescription for epinephrine.

At least one employee at each school shall receive training from a licensed medical professional in the administration of auto-injectable epinephrine. The school nurse or trained employee may administer the auto-injectable epinephrine to respond to a student's anaphylactic reaction, under a standing protocol from a physician licensed to practice medicine in the state.

Each public elementary and secondary school may maintain a supply of auto-injectable epinephrine at the school in a locked, secure, and easily accessible location. A licensed physician may prescribe epinephrine auto-injectors in the name of the school system or the individual school to be maintained for use when deemed necessary pursuant to the provisions of this policy.
